# Introduction

## What does it do?

This is backend module made to help with management of Shop System (**tt\_products**) for TYPO3. **Shop Manager** consist of two sections. With "Online Shop Structure" you can manage shop categories and items pretty simple. "Order Management" is a useful order status manager with customers e-mail notification support.

## Screenshots

### Online Shop Structure

The screenshot displays the 'Online Shop Structure' module. The main content area is titled 'Online Shop Structure' and contains a table of goods. The table has columns for 'Goods', 'Categories', and edit icons. The goods listed include various CD-books related to fashion and art. A sidebar on the left provides navigation options, and a right-hand panel shows a 'Categories' list with items like 'Инструменты', 'Книги', 'Палитры и портфолио', and 'Семинары'.

Goods	Categories	Edit
CD-Книга «Вечерние платья»	Книги	[Edit]
CD-Книга «Брюки - как покупать и с чем носить»	Книги	[Edit]
CD-книга «Все о прическах»	Книги	[Edit]
CD-Книга «Желтый - цвет блеска и радости»	Книги	[Edit]
CD-Книга «Кoeffициент консервативности или свобода выбора одежды»	Книги	[Edit]
CD-Книга «Красный - цвет власти и искушения»	Книги	[Edit]
CD-Книга «Оранжевый - цвет экзотики и молодости»	Книги	[Edit]
Книга "100% цвета"	Книги	[Edit]

### Order Management

The screenshot displays the 'Order Management' module. The main content area is titled 'Order Management' and shows a list of orders. The table has columns for order number, customer name, and amount. The order #324 is highlighted in red. A sidebar on the left provides navigation options, and a right-hand panel shows details for order #324, including a status dropdown set to '(2) Order is received and accepted by store' and a comment field.

Order #	Customer Name	Amount	Edit
324	Офицерова Дарья	150.00	[Edit]
320	Татьяна	150.00	[Edit]
315	Olessya Assimova	44250.00	[Edit]
314	Тагунова Майя	3050.00	[Edit]
312	Терешко Елена	150.00	[Edit]
311	Елена Герасимова	150.00	[Edit]
309	Мардогоямова Елена	950.00	[Edit]
304	Равенкова Оксана	300.00	[Edit]
303	Семён Выскубов	700.00	[Edit]
297	Егоян Оксана	8300.00	[Edit]
295	Сергеева П.А.	970.00	[Edit]
293	широносова натаалья	500.00	[Edit]
290	Чверткина Екатерина	1200.00	[Edit]

# Administration

## Installation and configuration

There is some constants of tt\_products are set in Constant Editor (Template configuration module) to make Shop System extension work correctly (like PIDstoreRoot). To run up some of tt\_products settings you should copy them from Constant Editor to fields that shown while you're trying to install this extension – shop\_manager in Extension Manager.

The screenshot shows the 'Extension Manager' interface for the 'Shop System Manager Module' (shop\_manager). The left sidebar contains a navigation menu with categories: WEB, FILE, USER TOOLS, ADMIN TOOLS, and HELP. The 'ADMIN TOOLS' section is expanded, showing 'Extension Manager' as the active tool. The main content area displays the extension's status as 'The extension is installed (loaded and running)!'. Below this, there is a 'Configuration' section with three input fields for constants: 'tt\_products PIDstoreRoot', 'tt\_products PIDcategories', and 'tt\_products PID for sys\_products\_or...'. Each field contains the value '8'. At the bottom, there is a checkbox for 'Swap module functions' which is currently unchecked.

You should set following constants:

- **PIDstoreRoot** – Page ID with tt\_products items
- **PIDcategories** – Page ID with tt\_products with categories (possible coincidence with PIDstoreRoot)
- **sys\_products\_orders** – Page ID with tt\_products orders
- **PIDtracking** – Frontent page ID where tt\_products frontend plugin width "tracking" code is set
- **domain** – website url without leading "http://"
- **orderEmail\_fromName** – value of from-filed for user email
- **orderEmail\_from** – email from witch messages to user will be sent

Here is also some settings available:

- **Swap module functions** – set it to swap order of module sections

- **Comma separated order statuses to be excluded** – a list of status codes to be unavailable in Order Management module section

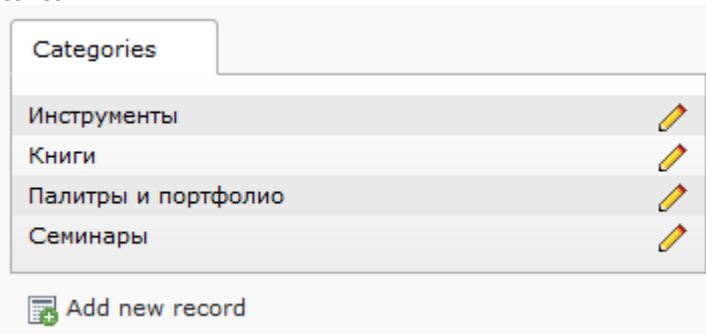

# Users manual

In this section will be presented modules capabilities.

## “Online Shop Structure” section

### Categories manager

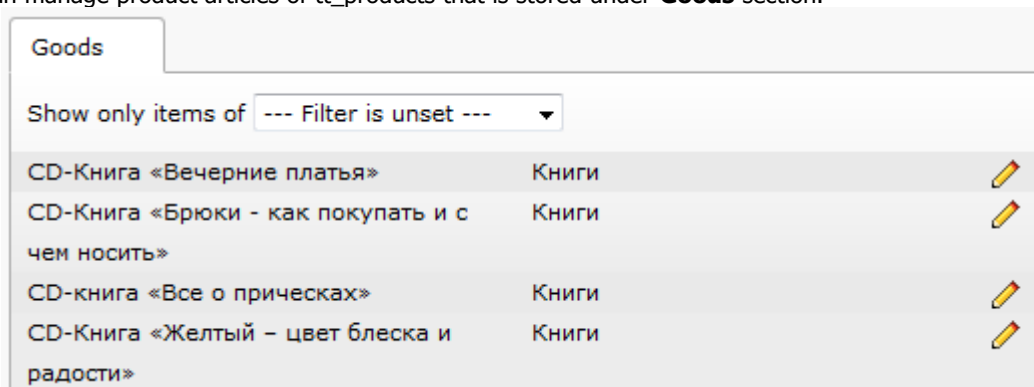

On the right you see categories list.

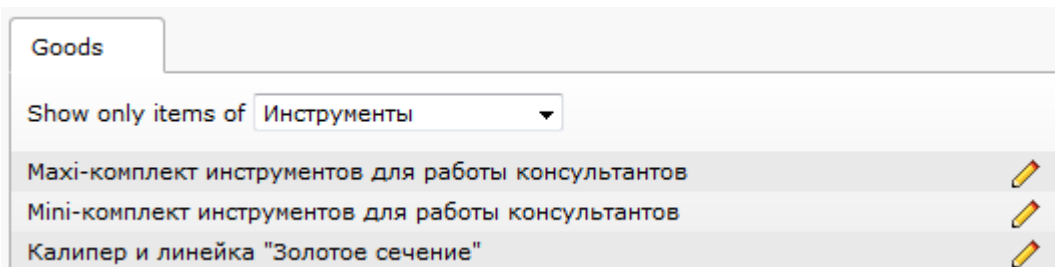

Using edit icon you can make changes to available categories. Using “Add new record” you can create new categories.

### Goods manager

Similar you can manage product articles of tt\_products that is stored under **Goods** section.

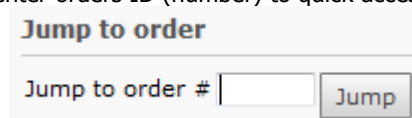

Here you can edit existing and create new tt\_products items. Also here is possible to set filter to display items only for special category.

## “Order Management” section

### Jump to order

On the right you see form where you can enter orders ID (number) to quick access.

### Orders list

On the left you see list of orders grouped by them statuses.

You can access to order details using edit icon. After this action you see order details with three tabs.

Details of order #296	
Created	
Updated	
Customer	
Address	
City	
Country	
Phone	
E-mail	
Total price	
Customer IP	

At first you see order details and customers information. In "Ordered items" is listed items that customer ordered. In "Status" tab you can see history of orders status changes and set another one.

Details of order #265		
---> (100) Order shipped and closed		
24.11.2011,	100	Заказ отправлен и закрыт
09:28:44		
07.11.2011,	2	<b>Магазин принял заказ:</b>
19:35:16 Елена, здравствуйте! Ваш заказ есть в наличии .		
К сожалению, не можем до вас дозвониться,		
чтоб уточнить способ оплаты и доставки. С		
Уважением, Анастасия		
04.11.2011,	1	Заказ подтверждён покупателем
00:37:02		

When another status is set there is appears field for comment and button to apply status changing.

Details of order #265	
---> (30) Other message from store	
Comment	<input type="text"/>
<input type="button" value="Change"/>	
24.11.2011,	100
Заказ отправлен и закрыт	

After submit user will receive email notification similar to that he receiving every time when status is changing.

## Known problems

Currently there are no known problems.

Problems should be reported to the my e-mail or published on extensions page of my blog - [http://uoziod.ru/dev/typo3/shop\\_manager/](http://uoziod.ru/dev/typo3/shop_manager/)

## To-Do list

Here are a few ideas for possible evolutions:

- Make possibility to **hide** (not just disable) some of statuses sections in "Order Management"
- Save previously set filter parameter in "Online Shop Structure" when back from edit or adding new shop article

Feature ideas or wishes can be posted to my e-mail or published on extensions page of my blog - [http://uoziod.ru/dev/typo3/shop\\_manager/](http://uoziod.ru/dev/typo3/shop_manager/)

# ChangeLog

Version	Changes:
0.1.0	Initial beta-release.
0.2.0	This version allows to set limit of displaying records in Order Tracking function of module.
0.3.0	<p>Thanks to Andrea Boselli for:</p> <p>Possibility to override the extension settings through the backend user's TypoScript. Basically if you add a TSconfig like this one:</p> <p><b>mod.user_shopmanager.PIDstoreRoot = 2</b></p> <p>PID of shop categories and shop items were divided (meant that you can set them separately).</p>
1.0.0	<p>Initial release.</p> <p>Works well with TYPO3 4.5. Code improvements. Interface improvements.</p>
